

TREASURE MAP

Cut out the tiles to make your own treasure map like the one below.

Start at the bottom of an A3 sheet of paper and place a tile with a dotted black line.

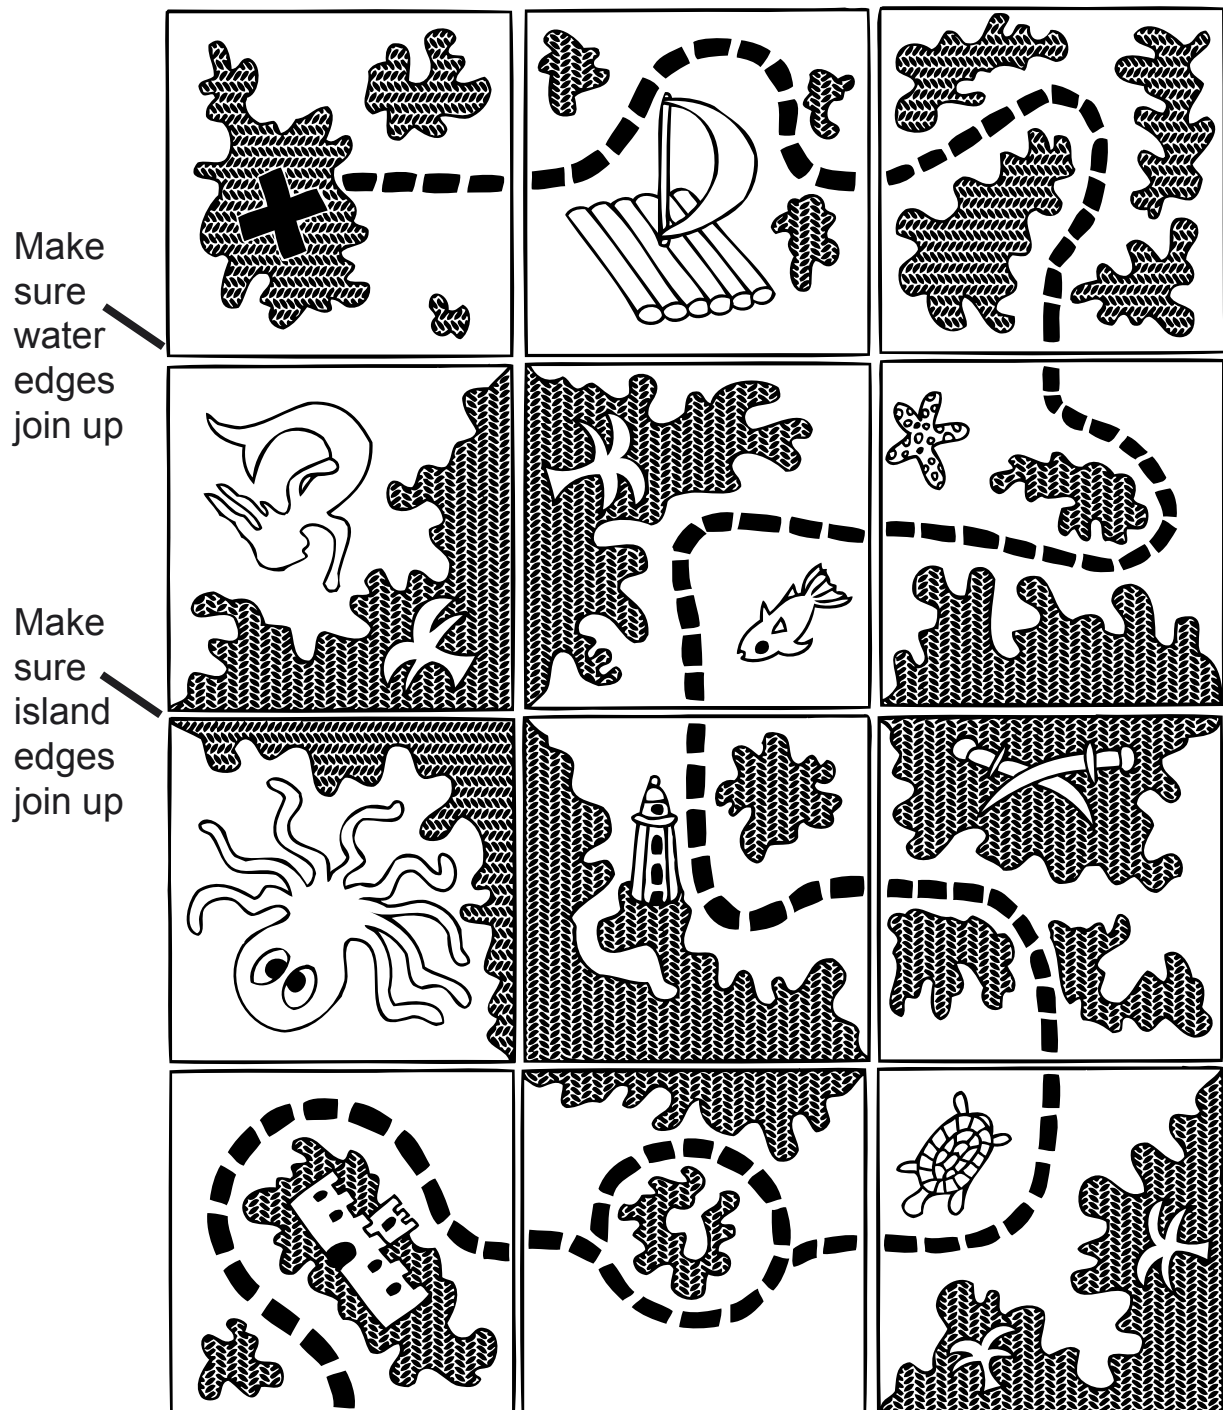

Continue adding tiles by joining the dotted black line.

Make sure the ocean edges join with other ocean edges and the land joins to land.

Finish the red line whenever you want by adding a treasure island (X marks the spot).

Add tiles without black lines to any blank spaces (your map will only use 12 tiles).

You may wish to glue your treasure map down and colour it in.
